

Good day, sir. I want to apply for the Junior Developer job at your latest job posting on LinkedIn. My background as a Web Developer, along with my education in online boot camps such as Udemy, has made me attain some excellent technical skills. In addition to my Web Development skills, I also have a great eye for problem-solving/bug-fixing; I believe that's what makes me more confident in this.

- * Exposure in large scale web apps.
- * Exposure in JavaScript technology such as React JS, MongoDB, Express.js, and Node JS.
- * Experience with Redux, Lazyapp, Redux Thunk, React Hooks and Google Map.
- * Strong knowledge in data structure, database, and algorithm.
- * Experience with eCommerce application using MERN Stack.
- * Knowledge in Braintree, Stripe Payment integration.
- * Developing web pages using HTML5, CSS3, SASS, Object-Oriented Javascript, ES6, JQuery, JSON.
- * Good understanding of Document Object Model (DOM) and DOM Functions.
- * Used Node Package Manager (NPM) to manage the modules and used it to install useful tools.
- * Creating user validation forms and using the RESTful services for sending the data to the server.
- * Familiar with MongoDB, Postgresql.
- * Used JWT Tokens for authentication.
- * Used Digital Ocean, Heroku, and Netlify for deployment.
- * Experience with the version controls GIT, GITHUB.

Moreover, I am always happy to learn even more technologies to sharpen my skillset whenever I get the chance [React Native is my current ongoing online boot camp]. Besides, I do have a passion to use innovative technologies as well. That's why I'm more than confident that I can be a great asset to your team. I would love to have the opportunity to work with you further.

If you want to contact me later, I'm always available on Email (abacusea@gmail.com). So, I am looking forward to starting the journey with 'Bluroot' as soon as possible with your permission. Thanks for considering,

Sincerely
Sufail. A
